

## **MEI LLC Receives Order for Solvent System New Equipment Order from a Repeat Customer**

**Albany, OR. December 6, 2006** – MEI LLC has received a purchase order for a multiple robot solvent wet station from a major manufacturer of semiconductor components in on the West Coast. The order required a custom design in a Rotary format to fit both the process needs and the space requirements of this customer. Stainless steel shell designs are particularly challenging, however MEI was up to the task even within the difficult timeline required for completion.

Dan Cappello, CEO of MEI said “I am very proud of our team here in Albany. This was the fifth custom design so far this year to be produced. I am unaware of any other company that would take on such a challenge and deliver so completely. Our strong booking activity continues and we are please to deliver any process configuration required to meet our customers’ needs.

### **About MEI LLC**

MEI is a diversified manufacturing and service company serving the semiconductor and high technology industries. The company’s specialties include wet process systems and services; robotics automation software; process tool rigging and crating services; clean room safety, ergonomic and support equipment; as well as a variety of manufacturing services, including machine, metal and plastic fabrication and powder coating.
